Camera Add Eyes, We Add Brain.

VISION AI FOR EDUCATION

AI that detects, analyzes, and protects bringing automation and safety to every corner of your campus.

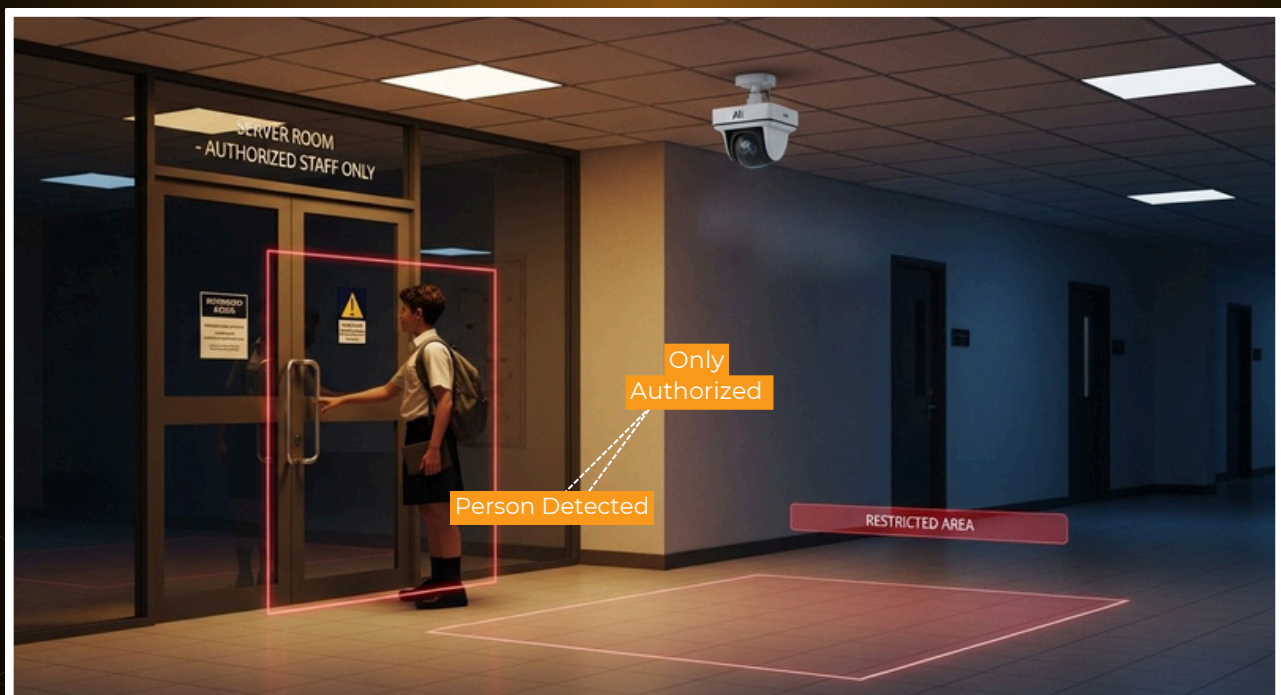

KEY FEATURES

Attendance + Behavior Analysis

- Automatically tracks attendance in real time.
- Analyzes behavior patterns to detect anomalies.

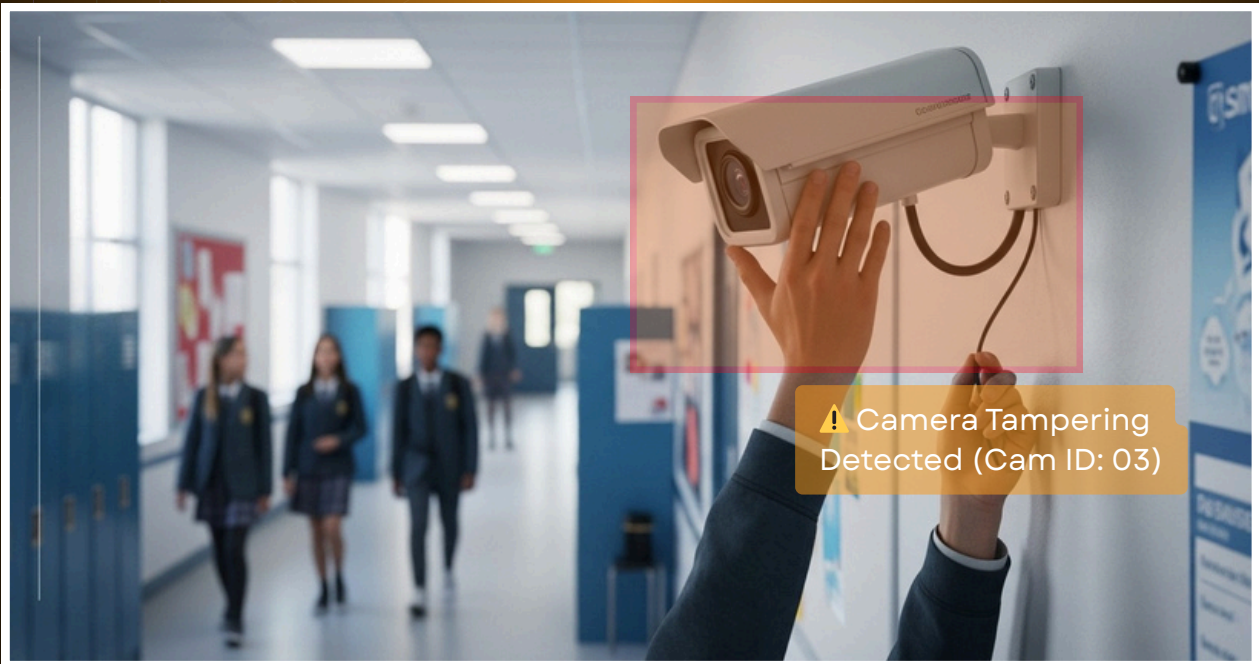

Restricted Area Monitoring

- Detects and alerts on unauthorized entries.
- Customizable access zones and alert levels.

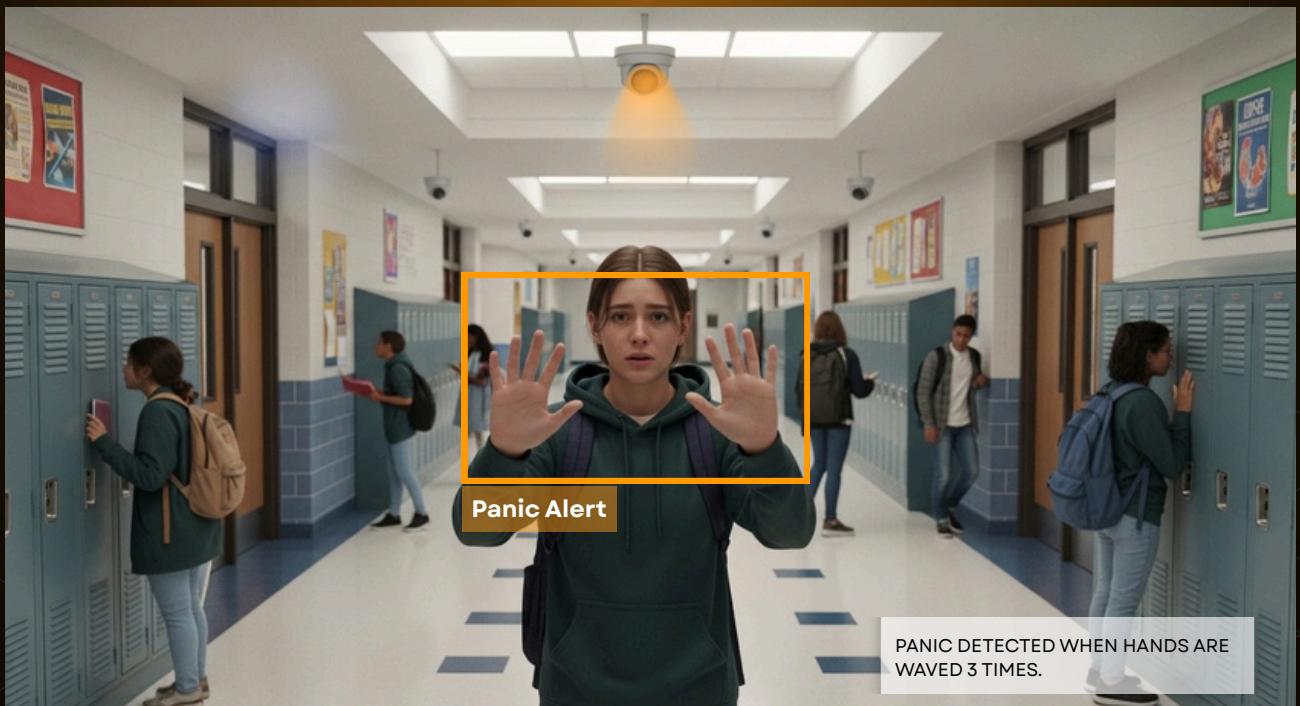

KEY FEATURES

Camera Tampering Detection

- Identifies unauthorized interference or damage attempts in real time.
- Instantly alerts the security team with visual evidence of tampering.

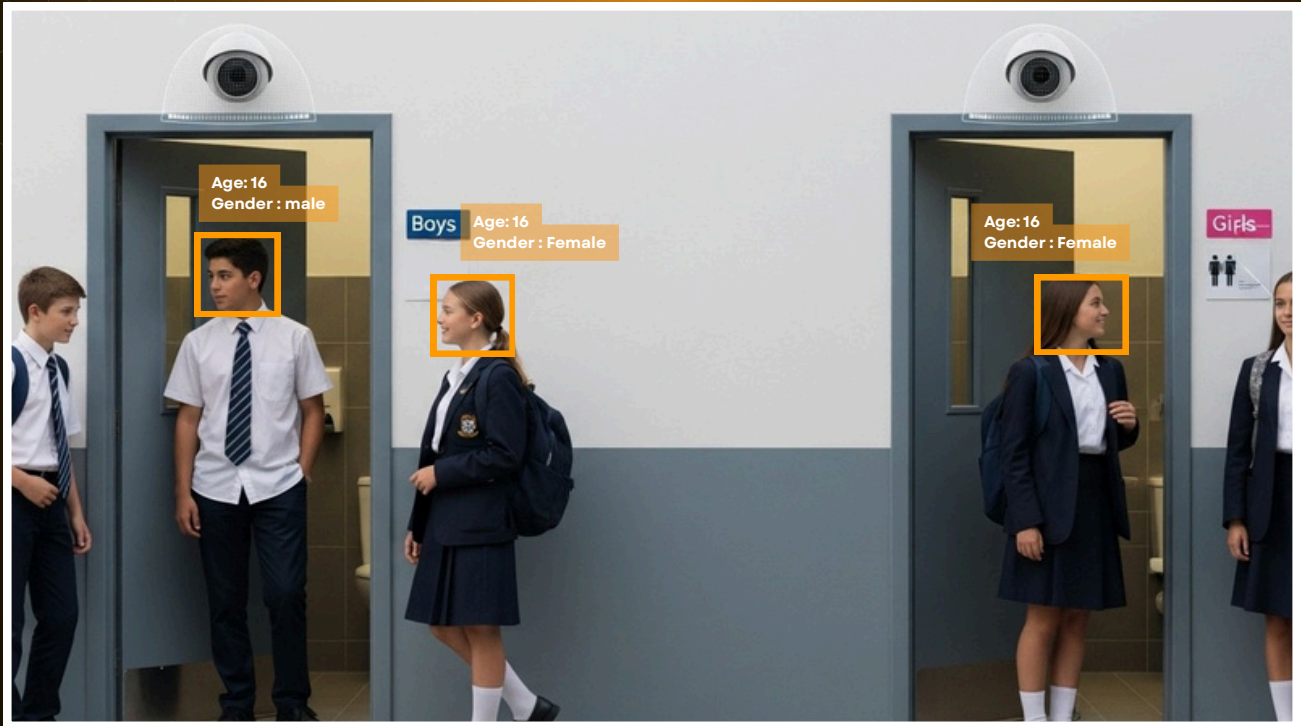

Panic Gesture Detection

- Detects panic or distress gestures using camera-based AI.
- Instantly triggers alerts to security or administrative teams for rapid response.

KEY FEATURES

Age & Gender Detection

- Automatically identifies the approximate age group and gender of each individual in real time.
- Enhances analytics and demographic insights for better campus management.
- Operates with high accuracy and privacy compliance, without storing personal data.
